Automate Many Reports – Increase Productivity Reduce time

Case in point : **A Global leader in Logistics and transportation**

The business

Profile : one of the world's leading providers of integrated **logistics provider**

Product range : Logistics and Transportation

Operations : 400+

Situation

Business issues

Productivity 300+ FTE working on 300+ reports with a frequency of Daily , monthly , consuming 100,000 hours.
Needed a solution to increase productivity and reduce time to manage huge reports which are vital for the business

Monitoring Monitoring reports was time consuming

Solution suggested

- Use of RPA (Robotic Process Automation) tools to automate the process of report generation , download, pre processing, formatting etc using Excel
- We did a combination of UI Path + Macros + VBA programming to ensure we have an efficient migration of the same

Benefits

Saved 1000's hours of productivity and the project is going on for the next 2 years as a CoE

Bottom line : *Increase Operational Efficiency , Increase Productivity , Reduce time with RPA software Robots*
