## Track shipment – Automate - Reduce time

**Case in point** : **A Global leader in Logistics and transportation**

Profile : Container shipping company

Product range : Shipping , Logistics and Transportation

Operations : World wide

### Situation

#### The Challenge

200+ tracking websites to enter the shipping information and manually check the status of the shipment and update the management thrice a day.

Issues : Mundane, time consuming, error prone manual approach

#### Solution suggested

Written a custom web scrapper come application caller application to submit the request, read the response and update the status

#### Benefits

1000's of hours saved monthly ,Error free

**Bottom line :** Increase Operational Efficiency , Increase Productivity , Reduce time with RPA software Robots
